GESTIONE SPORTIVA

Maranello, August 3rd, 2016

Dear Friends,

the first part of the season has finished not just for F1 but also for FDA.

The evaluation is undoubtedly positive for the two “seniors”, Antonio and Charles, respectively third and first in Championship, but also for the two “juniors”, that is Giuliano and Guanyu, who have showed signs of being competitive already.

The fact that during 10 GP3 races there's always been an FDA driver on the podium is a matter of pride of course.

I think that it's appropriate to thank those who before me created and managed this very interesting project, whose aim is to give drivers a full-scale training. What has been created is unique all over the world and destined to grow up.

I would like to thank you too because you are getting into minor formulas and into our young guys as well.

Our passion and enthusiasm are contagious and I hope they will be more and more, especially for your children, the future Ferraristi.

I wish you and your families to enjoy your holidays, hoping to meet you all in Monza!

Forza Ferrari!!!

Massimo Rivola
